Datalogic Memor

ShopMate compatible handheld scanner

It can be difficult to keep on top of your stock levels and product details especially when your till is required to make these changes.

ShopMate is fully integrated into the Datalogic Memor Hand-Held scanner to make stock-control, product management and SEL printing simpler.

Datalogic Memor

ShopMate compatible handheld scanner

The Memor features a variety of useful tools that make managing your retail business easier and can save you money.
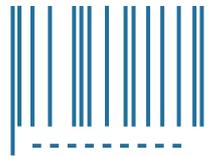

Shelf-edge label generation:

With regular price changes from the wholesaler, it is essential that you keep your SEL's up to date. Your Memor Hand-held scanner and ShopMate EPoS system can create and print SEL sheets quickly and easily.
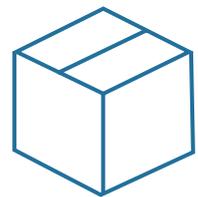

Stock control:

The Memor's light but durable body makes it perfect for stock management. Keep it with you around the store and efficiently carry out stock takes, check goods in, returns, damages, out of dates and more.

Product management:

Your Memor can add and modify product information, pack size, cost and RRP. You can even set your own pricing rules.

Direct wholesale ordering:

You can scan products throughout your shop and place an order. You can then choose to update your stock automatically with electronic delivery notes (ENODs) from your wholesaler.
