Your Financial Summary

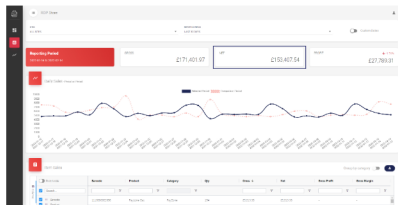

Your Financial Summary is an important indicator of your business' performance throughout the date range you've specified.

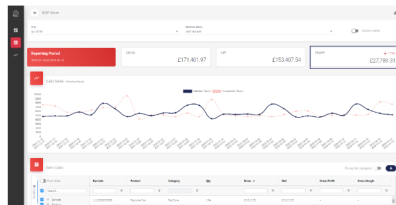

In the red box, you'll see details of your date-range.

Your *Gross Sales* is a calculation of the total value of every transaction that your EPoS system has processed in the date range you've previously specified.

Your *Net Sales* is a calculation of the gross sales minus any discounts and returns that you have processed on your EPoS System.

Your *Profit* is an approximate calculation of the margin earned for your product sales. This does not take into account other business expenses, such as wages and rates, as these are unlikely to be handled by your EPoS system.
